Harare, Zimbabwe

PROFILE

Results-driven IT Service Delivery specialist with proven experience managing 24/7 technology operations across multi-country production environments supporting 1,500+ users. Skilled in ensuring high availability, reliability, and performance of mission-critical systems through structured incident response, SLA governance, and proactive monitoring. Strong leadership, communication, and stakeholder engagement capabilities, with a track record of reducing MTTR by 60%, achieving 98% SLA compliance, and aligning IT services with business objectives. Experienced in overseeing helpdesk operations, change management processes, vendor performance, and cross-functional collaboration to maintain agreed service standards and foster a customer-focused culture.

CORE COMPETENCIES

- Strategic IT Operations & Infrastructure Management
 - IT Governance, Policies & SOP Development
 - Team Leadership, Training & Performance Management
 - Network Security & Cybersecurity Compliance
 - Disaster Recovery & Business Continuity Planning
 - Project Management & Cross-Border Deployments
 - Server & Network Administration (FortiGate, Sophos, Unifi, Active Directory)
 - Service Management (Freshservice, SLA Tracking, ITIL Practices)
-

PROFESSIONAL EXPERIENCE

HVC IT Service Delivery Lead | Global Tech Solutions

Zimworx – Harare, Zimbabwe | October 2025 – Present

- Directed 24/7 IT service operations across Zimbabwe, USA, Costa Rica, and Zambia, ensuring high availability and performance of High Value Client (HVC) systems supporting 1,500+ users with 98% SLA compliance.
- Served as primary escalation point for critical HVC incidents, leading coordinated incident response across infrastructure, network, and application teams, reducing MTTR by 60%.

- Led weekly and monthly service review meetings with stakeholders, presenting system health, risks, and performance analytics.
- Standardized HVC onboarding frameworks, escalation matrices, and troubleshooting decision trees to improve consistency and reduce repeat incidents by 30%.
- Implemented automation for user provisioning/deprovisioning using APIs, webhooks, and PowerShell scripting.
- Oversaw HVC helpdesk operations and Tier 1–2 escalation workflows, increasing first-contact resolution to 80% and reducing repeated escalations by 30%.
- Designed, implemented, and monitored Performance SLAs (PSLAs), ensuring adherence to agreed service standards across high-value client environments.
- Acted as the primary liaison between Technology Services and business stakeholders, leading service review meetings and preserving \$32,000/month in high-value client revenue.
- Managed vendor relationships, including ISPs and security providers, strengthening redundancy models and improving service reliability for high-value client BPOs.
- Led change management governance, standardizing SOPs for patching, upgrades, migrations, and infrastructure deployment for HVCs.
- Implemented proactive monitoring solutions via centralized service dashboards (Zabbix and FreshService), providing real-time visibility into system uptime and infrastructure health, and incident trends, reducing incident response time by 80%.
- Designed and implemented automated user provisioning/deprovisioning using APIs, webhooks, and PowerShell, improving onboarding efficiency and reducing manual errors.
- Strengthened collaboration between NOC, infrastructure, and client success teams to ensure proactive issue management.

Senior Global Technical Solutions Technician

Zimworx – Harare, Zimbabwe | July 2021 – September 2025

- Led 24/7 IT infrastructure and support operations across distributed enterprise environments (US, Zimbabwe, Costa Rica, and Zambia), supporting 1,500+ users.
- Supervised a team of 8 infrastructure and support technicians, managing daily helpdesk operations, escalations, and service performance.
- Led client IT onboarding engagements, gathering technical service requirements and ensuring zero onboarding delays across 50+ projects.
- Managed deployment and maintenance of FortiGate Firewalls (201F, 100E, and 101E) administration across 5 sites.
- Administered centralized Active Directory for 1,500+ users across four countries using GPOs for security enforcement and automation.
- Established a quarterly IT asset lifecycle strategy to proactively address recurring hardware failures.

- Supported production telephony systems, VPNs, endpoint security, and business-critical applications.
 - Trained 200+ users on enterprise collaboration tools, reducing support requests by 20%.
 - Authored 50+ knowledge base articles in Freshservice ITSM, reducing repeat escalations by 30%.
 - Delivered executive infrastructure performance reports supporting strategic expansion into new regional sites.
 - Led enterprise-level initiatives, including:
 - Network segmentation and SD-WAN implementation for premium HVCs.
 - Active Directory migration to Azure.
 - Implementing ISP redundancy and failover architecture.
 - Centralized proxy forwarding deployment
 - Improved overall uptime reliability by over 90% through multi-site failover design.
-

IT Intern

Municipality of Chinhoyi – Chinhoyi, Zimbabwe | October 2018 – July 2019

- Deployed, maintained, and upgraded 30+ workstations and multifunction network printers across multiple departments, reducing user-reported hardware incidents.
 - Monitored and updated software licensing records for Microsoft 365 and AutoCAD, ensuring 100% license compliance and audit readiness.
 - Delivered ERP system training and technical support to 30+ staff members, improving operational efficiency and reducing ERP-related support issues.
-

EDUCATION

Midlands State University, Gweru | 2016 – 2021

- BSc (Hons) Information Systems – First Class | University Book Prize Winner – 2021
-

CERTIFICATIONS

- ITIL 4 Foundation (In Progress)
 - Fortinet Certified Associate Cybersecurity (Aug 2025)
 - Oracle Cloud Infrastructure Foundations Associate (Feb 2022)
-

PROJECT HIGHLIGHTS

- **Freshservice ITSM Implementation (2022):** Spearheaded the successful deployment of Freshservice across multi-site environments, improving incident tracking and resolution time by 40% through automation, SLA management, and asset tracking capabilities.
- **Structured Network Redesign – Joina City Site (2023):** Led the network remodeling and standardization of legacy infrastructure, increasing network reliability and alignment with modern security and performance standards.
- **Costa Rica Office Launch (2023):** Designed and implemented scalable network infrastructure to support up to 100 users at the new Central America site.
- **Zimbabwe ISP Migration & Redundancy (2024):** Executed a seamless ISP transition with redundancy failover to improve uptime and network resilience.
